SKILLS/QUALIFICATIONS

- Java, C++, Python, Go, Swift, Javascript, PHP, HTML, CSS, Spring MVC, JSON, Avro, XML, MySQL, NoSQL, RESTful APIs, Spring Boot, Scala, Spark, Postman, Insomnia, Docker, Maven, Shell Scripting, UNIX, Linux, JBOSS EAP (Server), Wildfly, Tomcat, Kubernetes, Openshift, FHIR (Data Transfer), Terraform, S3, RDS, EKS, ECR, AWS, Log4j, React, Abyss, Wireshark, GraphQL, Hasura
- Elasticsearch, Kafka Streams, Jenkins, Apache Pig Latin, Hadoop, Web Scrape (BS4), Containerized Platform Management
- Big Data Architecture, Mobile Architecture, Web Design, CI/CD, TDD
- Microsoft Office Suite (Word, Excel, SharePoint, Teams, PowerPoint, OneDrive)
- Agile/Waterfall Methodology
- Architecture Design and Solutioning Experience
- Team Lead Experience

EXPERIENCE

- Capital One, Manhattan, NYC **2024 - Current**
 - **Manager, Software Engineering** **2025 - Current**
 - Led two full-stack engineering teams within Cybersecurity SRE, spanning platform rollouts and AI/ML infrastructure
 - Drove enterprise-wide deployment of Cybersecurity tooling, standards, and automation across all Capital One engineering teams
 - Oversaw development and release of AI/ML pipelines that predict infrastructure outages and trigger autonomous remediation to prevent incidents proactively
 - **Senior Software Engineer** **2024 - 2025**
 - Full Stack Engineer specializing in cybersecurity, artificial intelligence and horizontal team management.
- Optum, UnitedHealth Group, Basking Ridge, NJ **2016 - 2024**
 - **Senior Software Engineer** **2021 - 2024**
 - Lead a team of 12 full time Software Engineers.
 - Orchestrate deployments for APIs, Kafka Streaming components and Batch Jobs.
 - Champion bi-weekly seminars that research and develop modern testing solutions.
 - Design and build Search based Java Spring boot APIs, Real Time Kafka streaming solutions, Multiregional AWS Disaster Recovery, AWS Data Migration Applications.
 - Helped transition contractors to full time hires and hosted weekly touchpoints for interns and newly hired individuals to freely ask questions.
 - Build creative and innovative automated DevOps solutions.
 - **Software Engineer** **2020 - 2021**

- Search based API Development, Real time Kafka streaming, AWS Process Migrations and file ingestion.
- Designed and implemented Microservice architecture throughout API Ecosystem.
- o **Technology Development Program Associate** **2019 - 2020**
 - Built, maintained, and designed CI/CD and automation solutions for Java web services.
- o **Software Development Intern** **Summers 2016 - 2018**
 - Created real-time Kafka streaming processes to replace batch updating.
 - Built mobile interfaces for application monitoring.
 - Developed Java web services and provided backend support for user interfaces.
- Self Employed/part-time (throughout college)
 - o **Website Developer** **2017 - 2018**
 - Provided website solutions for multiple business entities.
- Washington College, Chestertown, MD.
 - o **Python Programmer** **2015 - 2016**
 - Designed Python algorithms for data standardization.
 - Managed team of 3 Developers.
 - o **IT Help Desk**
 - Helped build and troubleshoot large scale technical solutions for University infrastructure.

EDUCATION

- Emerging Leaders Program, UnitedHealth Group **2019 - 2021**
- Washington College, Chestertown, MD **Graduation May 2019**
 - o BA in Computer Science, Dual Minor in Information Systems and Business Management.
 - o GPA - 3.7
